## 2009-Research Funding in Numbers

In 2009 the Swiss National Science Foundation (SNSF) granted funding to the total value of 707 millions francs, 6 \% more than in 2008 ( 663 millions francs). This financing was used to support around 2900 research undertakings.

The statistics include the applications handled and approved during the financial year and contributions paid out in 2009 in the area of National Centres of Competence in Research. Additional contributions are not treated as separate applications, but are contained in the approved amounts.

The data in the statistical part of the annual report are not comparable with the figures in the annual statement.

## 1. Funding in Overview

### 1.1 Funding by science area

Amounts in millions CHF

## Distribution of the approved amounts

|  | Approved amount | Women | Men |
| :--- | ---: | ---: | ---: |
| Humanities and Social Sciences | 172.6 | $29 \%$ | $71 \%$ |
| Mathematics, Natural and Engineering Sciences | 262.8 | $11 \%$ | $89 \%$ |
| Biology and Medicine | 271.4 | $17 \%$ | $83 \%$ |
| Unassignable | 0.3 |  |  |
| Total | 707.1 | $18 \%$ | $82 \%$ |

The distribution between the scientific areas has changed slightly in comparison with the previous year. Since in 2009 only very limited funds were available for the Special Programme University Medicine (SPUM) and the Patient-oriented Clinical Research (PaKliF) in comparison with 2008, the "Biology and Medicine" portion of the approved funds has been reduced by 4 per cent.

### 1.2 Funding by type of funding

| National Research Programmes (NRP) | 17.2 | 46 |
| National Centres of Competence in Research (NCCR) | 69.9 | 210 |
| Total | 707.1 | 2869 |

As in previous years, Project Funding was at the centre of the SNSF's activity in 2009. The proportion of Targeted Research ( $12.3 \%$ ) and Individual Funding ( $22.8 \%$ ) of the overall approved amount increased slightly in comparison to 2008.

### 1.4 Use of the approved amounts

Total amount: $\mathbf{7 0 7 . 1}$ million CHF

As in previous years, the approved funds were used by the researchers mainly for the cost of personnel, whether for the financing of individual salaries/scholarships in the context of funding for individuals or for the appointment of personnel in research projects.

### 1.5 Personnel in research projects

Around 5000 persons were employed in research projects in 2009. In addition, over 800 were supported in the context of Individual Funding and 1400 were employed through the National Research Programmes and Centres of Competence in Research.

|  | Total | Women | Men |
| :--- | ---: | ---: | ---: |

| Total | $100 \%$ | $44 \%$ | $56 \%$ |

${ }^{1}$ Scientific personnel and Post-docs

Funding for research projects primarily benefits the promotion of young scientists in Switzerland. Thus 79 \% of the collaborators are 35 years or younger ( $96 \%$ in the case of personnel at doctoral level, $57 \%$ for other scientists).

### 1.6 Success rates

${ }^{4}$ No new NCCR in 2009
Success rates vary according to the type of funding. Since 2008 the SNSF carries out an annual gender monitoring, which investigates the success rates of both sexes.
It should be noted, that the success rates of the Project and Individual Funding contain both new applications and applications for continuation.

## 2. Project Funding

In this funding category, the SNSF supports qualitatively high grade research projects in all disciplines, whose themes are selected by the respective researchers themselves. The grants include contributions for personnel costs, equipment consumables and travel expenses.

${ }^{1}$ Special funding is included:
DORE ( 76 grants; 8.6 million CHF), Research Infrastructure ( 9 grants; 10.6 million CHF), R'Equip ( 1 grant; 0.1 million CHF), Scientific Conferences (119 grants; 0.8 million CHF), Summer Schools ( 115 grants; 0.3 million CHF)

In 2009, the lion's share of the project contributions ( 33 per cent) went to the broad group of disciplines, legal and social sciences and economics. An important emphasis in the assessment of applications lay in the evaluation and the long-term support of large research infrastructures. These include mainly social sciences undertakings, which are newly impacted by an overall European-promoted accumulation of data related to the issue of the ageing population.

## Division II: Mathematics, Natural and Engineering Sciences

${ }^{1}$ Special funding is included:
Research Infrastructure (1 grant; 0.4 million CHF), R'Equip, ( 69 grants; 13.1 million CHF), FORCE/FINES, (13 grants; 6.0 million CHF), ERA-ASPERA ( 2 grants; 0.8 million CHF), EUROCORES ( 8 grants; 2.3 million CHF), Scientific Conferences ( 21 grants, 0.09 million CHF)

The distribution of the approved amounts within the different groups of disciplines has changed very little relative to the previous year, with the exception of the engineering sciences (2007: 19.3 million CHF; 2008: 33.0 million CHF). Support for the purchase and improvement of laboratory equipment (R'Equip) was further strengthened in 2009 and the number of approved applications (40) almost doubled in comparison to the previous year. The SNSF also approved, for the first time, two projects in the context of an ERA-NET research programme (ASPERA: astroparticle physics).

## Division II I: Biology and Medicine

## Subdivision of the approved amounts

In 2009, the division of Biology and Medicine significantly expanded the spectrum of their contributions to European and international research networks with participation in many European initiatives, such as the EUROCORES programmes EuroMEMBRANE and EuroSYNBIO, the ERA-NET EuroNanoMed and EDCTP programme (European and Developing Countries Clinical Trials Partnership).

### 2.3 I nterdisciplinary Research and Sinergia

## I nterdisciplinary Research

In 2009 the SNSF supported a total of 33 projects with 11.7 million CHF. Both the number of submitted applications and the approved grants, as well as the requested and approved funding amounts are higher in comparison with 2008.

## Number of applications and grants

The number of applications submitted for Project Funding increased continually from 2005 to 2009. The number of grants also increased from 2005 to 2008. In 2009 the SNSF approved fewer applications than in the previous year, with the goal of increasing the financial allocation for each approved project.

The number of applications submitted includes all project applications as well as conference applications and applications for special funding. ${ }^{1}$

### 2.6 Requested and approved amounts since the year 2000 Amounts in millions CHF

## Total of requested and approved amounts

Since 2007 the requested project funding has increased more than the corresponding budget of the SNSF. For the year 2008, the sum of the approved funds is comparatively high, since for the Special Programme University Medicine (SPUM) and the Patient-oriented Clinical Research (PaKliF) specifically assigned means of approx. 53 million francs were made available. In 2009 there was only a very restricted scope for grants for PaKliF.

## Success rates by instrument ${ }^{2}$

[^3]In total in the category of Individual Funding around 200 more applications were submitted and evaluated than in the previous year ( $+17 \%$ ). In comparison to the previous year in particular, the number of submitted applications for the fellowships for prospective researchers ( +127 applications), Ambizione ( +57 applications), the MHV Programme ( +22 applications) and ProDoc (+17 applications) increased significantly. For the SNSF Professorships the applications remained at a level similar to the previous year, and for the advanced fellowships there was a slight downturn (-18 applications).

## 4. International Co-operation and Networking

The international involvement of the SNSF manifests itself principally in the transnational cooperation of researchers within the context of Project Funding and Individual Funding. This is supplemented by instruments for use in international collaboration.

Nearly 3400 instances of international collaboration have taken place in total. The table shows the ten countries with which the most frequent collaboration has occurred.

### 4.3 Host countries with fellowship recipients

With 542 fellowships for prospective and advanced researchers, the SNSF supported a total of 587 work periods abroad. The graph shows the ten most frequent host countries.

## 5. National Research Programmes (NRP)

The National Research Programmes develop scientifically substantiated solutions to urgent problems of national significance.

${ }^{4}$ Selection process not yet concluded
In 2009 three new NRPs started. In the NRP "Sustainable Water Management" and in the NRP "Smart Materials" 16 and 21 projects respectively were approved and the research work commenced. The NRP "Stem Cells and Regenerative Medicine" has likewise begun, albeit with a small budget for the evaluation. For the three further NRPs of the evaluation round of 2007-2008, the research phase will begin during 2010.

The gender balance in the ongoing programmes has barely changed (women $20 \%$, men $80 \%$ ).
