## 2013 - Research funding in figures

> In 2013, the Swiss National Science Foundation (SNSF) granted funding to the total value of CHF 818.8 million, $8.4 \%$ more than in 2012 (CHF 755.2 million). This financing was used to support over 3,400 research projects.

## 1. Overview of funding

### 1.1 Funding by research area

Amounts in CHF million

Distribution of the approved amounts

Humanities and social sciences
$\square$ Mathematics, natural and engineering sciences

- Biology and medicine

|  | Amount | Women \| Men |  |
| :--- | ---: | :--- | :--- |
| Humanities and social sciences | 223.8 | $32 \%$ | $68 \%$ |
| Mathematics, natural and engineering sciences | 265.4 | $13 \%$ | $87 \%$ |
| Biology and medicine | 329.2 | $21 \%$ | $79 \%$ |
| Unapportionable | 0.4 |  |  |
| Total | 818.8 | $21 \%$ | $79 \%$ |

The allocation to the research areas has changed slightly year-on-year. The share of the humanities and social sciences has risen by three percent.

Approved amounts since 2005

- Total
- Biology and medicine
- Mathematics, natural and engineering sciences
- Humanities and social sciences

The distribution of funds across the three research areas is based largely on demand.

### 1.2 Funding by scheme

Amounts in CHF million

Distribution of the approved amounts

- Infrastructures
- Science communication

|  | Number | Amount |
| :--- | ---: | ---: |
| Projects | 1,217 | 416.5 |
| Careers | 1,280 | 179.2 |
| Programmes | 432 | 160.4 |
| Infrastructures | 96 | 56.9 |
| Science communication | 378 | 5.8 |
| Total | 3,403 | 818.8 |

In 2013, the SNSF allocated more than half of its funds to its main funding scheme, project funding. The share of infrastructures has more than doubled year-on-year, from three to seven percent (for details see p. 44).

### 1.4 Use of approved amounts

As in previous years, the approved funds were used by the researchers mainly to cover personnel costs, whether for the financing of individual salaries/fellowships in the context of career funding or for the appointment of personnel in research projects.

### 1.5 Personnel in research projects

In total, the SNSF supported approximately 8,900 collaborators in 2013: around 5,300 through project funding, 1,000 through career funding and 2,600 through programmes.

The SNSF analyses the differences between the success rates of female and male applicants every year.
For this purpose, it has introduced a gender equality monitoring system that examines the differences and attempts to identify the determining factors.

Submitted applications by gender

|  | Women | Men |  |
| :--- | :--- | :--- | :--- |
| Doc.CH | $64 \%$ |  | $36 \%$ |
| Doc.Mobility | $44 \%$ | $56 \%$ |  |
| Early Postdoc.Mobility | $40 \%$ | $60 \%$ |  |
| Advanced Postdoc.Mobility | $46 \%$ | $54 \%$ |  |
| Marie Heim-Vögtlin grants (MHV) ${ }^{1}$ | $100 \%$ |  |  |
| Ambizione | $38 \%$ | $62 \%$ |  |
| SNSF professorships | $29 \%$ | $71 \%$ |  |
| Projects | $22 \%$ | $78 \%$ |  |

1 The proportion of female applicants is $100 \%$ as the MHV grant is a programme for women scientists.

## 2. Projects

The SNSF supports research projects of high quality across all disciplines. The topics are selected by the researchers. Grants include contributions towards personnel costs, equipment, consumables and travel expenses.

### 2.1 Funding by research area

Amounts in CHF million

Distribution of the approved amounts

| Humanities and social sciences | Amount |
| :--- | ---: |
| Mathematics, natural and engineering sciences | 95.0 |
| Biology and medicine | 139.6 |
| Interdisciplinary research | 166.2 |
| Total | 15.8 |

Due to rising demand, the SNSF has made more money available for the humanities and social sciences. Their share has grown by three percent to $23 \%$ in the last two years.

## - Biology and medicine

- Interdisciplinary research

### 2.2 Funding by group of disciplines

Amounts in CHF million

## Division I: Humanities and Social Sciences

Distribution of the approved amounts

- Philosophy, psychology, educational sciences and religious sciences
$\square$ Legal and social sciences, economics
$\square$ History
$\square$ Archaeology, ethnology, art studies and social urban science
- Linguistics and literature

|  | Number | Amount |
| :--- | ---: | ---: |
| Philosophy, psychology, educational sciences and religious sciences | 89 | 25.4 |
| Legal and social sciences, economics | 105 | 26.4 |
| History | 26 | 7.5 |
| Archaeology, ethnology, art studies and social urban science | 64 | 19.1 |
| Linguistics and literature | 50 | 16.6 |
| Total | 334 | 95.0 |

Compared to the previous year, the share of grants for history was significantly lower ( $14 \%$ > $8 \%$ ). In contrast, the share of linguistics and literature was higher ( $10 \%$ > $17 \%$ ). All in all, the changes can be regarded as normal fluctuations.

Division II: Mathematics, Natural and Engineering Sciences

Distribution of the approved amounts

| Mathematics | Number | Amount |
| :--- | ---: | ---: |
| Astronomy, astrophysics and space sciences | 42 | 12.1 |
| Chemistry | 20 | 7.8 |
| Physics | 78 | 26.4 |
| Engineering sciences | 96 | 34.5 |
| Environmental sciences | 154 | 35.3 |

## Division III: Biology and Medicine

Distribution of the approved amounts

Basic biological research

- General biology

Basic medical research

- Experimental medicine
- Clinical medicine
- Preventive medicine
- Social medicine

|  | Number | Amount |
| :--- | ---: | ---: |
| Basic biological research | 106 | 57.7 |
| General biology | 37 | 14.9 |
| Basic medical research | 77 | 37.0 |
| Experimental medicine | 61 | 30.0 |
| Clinical medicine | 54 | 20.3 |
| Preventive medicine (epidemiology/early diagnosis/prevention) | 16 | 5.9 |
| Social medicine | 1 | 0.4 |
| Total | 352 | 166.2 |

The funds of division III are mainly allocated to basic biological and medical research. Fewer applications are submitted and grants approved in more practice-oriented areas such as clinical medicine or social and preventive medicine.

### 2.3 Grants, reductions and rejections

Amounts in CHF million

### 2.4 Number of applications and grants since 2005

- Applications submitted
- Applications approved
- Applications by women
- Applications by women approved

Between 2005 and 2011, the number of applications in project funding rose continually (by $37 \%$ in total). Since then, the number of applications has been high but stable. Although the share of applications by women remains low, it reached its highest mark since 2005 in the report year ( $22 \%$ ).

### 2.5 Requested and approved amounts since 2005

## CHF million

- Total requested funding
- Total approved funding
- Amount requested by women
- Amount granted to women

The demand for project funding has stabilised, albeit at a high level, after continually rising between 2005 and 2011.

### 2.6 International networking

## Number of international collaborations

In total, 4,324 instances of international collaboration have taken place in the context of projects supported by the SNSF. The table shows the 15 countries collaborated with most frequently.

## 3. Careers

The SNSF has a wide range of funding options in place to promote the careers of young researchers.

### 3.1 Funding by scheme

Amounts in CHF million

|  | Number of applications submitted |  |  |  |  | Number of applications approved |  |  |  |  | Approved amount |

${ }^{1}$ Research semesters for departing members of the National Research Council
${ }^{2}$ Mobility grants and " $120 \%$ support grants" are supplementary grants in projects and are therefore not treated as separate applications. Hence they are not accounted for in the total number of applications, but are considered in the amount.

All in all, the demand for career funding continued to rise strongly in 2013. The mobility fellowships were reorganised and the first Doc.CH grants were awarded (see p. 14/15). Postdoctoral researchers were able to apply for the new " $120 \%$ support grants" as of summer 2013.

${ }^{1}$ Sub-projects
${ }^{2}$ Additional personnel costs and supplementary grants

### 4.2 National Research Programmes

Amounts in CHF million

The National Research Programmes (NRPs) study problems of societal, political and economic importance for Switzerland. The topics are prescribed by the Federal Council.

| Current NRPs | Approved amount $2013^{1}$ | Overall budget | Overall amount approved up to $2013^{2}$ | Duration |
| :---: | :---: | :---: | :---: | :---: |
| NRP 60 Gender Equality | 0.2 | 8.0 | 6.9 | 2010-2013 |

| Total | 14.4 | 166.0 | 91.0 |  |

${ }^{1}$ Excluding grants for formally terminated programmes (CHF 0.1 million)
${ }^{2}$ These amounts do not take account of repayments, third-party funds, etc.

In 2013, the SNSF issued calls for two new NRPs devoted to the topics "Energy Turnaround" and "Managing Energy Consumption" respectively.

### 4.3 National Centres of Competence in Research

Amounts in CHF million

With the National Centres of Competence in Research the SNSF promotes long-term research networks in areas of strategic significance for the future of Swiss science, economy and society.

| Series 2005 | SNSF contribution $2013{ }^{1}$ | SNSF contribution for 12 years | Total budget for 12 years | Start | Home institution |

[^0]:    The statistics include all applications processed and approved during the financial year as well as contributions paid out in the area of National Centres of Competence in Research in 2013. Additional grants are not treated as separate applications but are included in the approved amounts. The gender statistics refer to the share of responsible applicants. Some of the total amounts may contain rounding differences.

    The data in the statistical part of the annual report is not comparable with the figures in the annual statement.

[^1]:    1 Senior researchers and postdocs

[^2]:    ${ }^{1}$ Also contains contributions for management, knowledge and technology transfer, promotion of young scientists, etc.
