Data Management Plan

The proposal must include a Data Management Plan (DMP) set up according to the requirements issued by the SNSF. The aim of a DMP is to plan the life cycle of data. It offers a long-term perspective by outlining how data will be generated, collected, documented, shared and preserved.

The DMP is an integral part of the grant proposal. The proposal can only be submitted once the DMP has been completed. Applicants must enter a DMP that is understandable, suits their project and meets the standards set by their research community. **At this stage, the DMP is considered a draft and excluded from the evaluation process**. The definitive DMP must be provided by the end of the project at the latest.

Please keep in mind the time needed to complete the DMP during the submission procedure.

The content of the DMP is directly entered in the mySNF submission form. It is not possible to upload a DMP as a separate PDF file.

The DMP is not part of the scientific evaluation process and is not shared with external reviewers.

- Content of the DMP
- DMP – Guidelines for researchers
- Open Research Data

Eligible costs

- Costs for **granting access to research data** (Open Research Data)

  - IR Art. 2.13
